## EXPERIENCE

---

Fullstack Developer – PT Rahmah Group Internasional | 2024–2025

- Led the digital transformation of Umrah operations by creating an integrated system that covers registration, service tracking, and product logistics, improving coordination across teams.
- Built an HRIS platform to streamline HR administration and enhance data accessibility.
- Coordinated with multiple departments to identify needs and deliver effective technical features.
- Technologies: JavaScript (Fullstack).

Frontend Developer & Instructor – PT Mastah Digital Teknologi | 2024–2025

- Designed and implemented LMS and CBT applications for SMK Jakarta Pusat 1 to support reliable digital learning and testing.
- Served as an instructor for the Software Engineering program, mentoring students to meet industry-relevant skill standards.
- Technologies: Node.js, JavaScript, TypeScript, Go, PostgreSQL.

Fullstack Developer (Team Lead/Member) – Centrova Team | 2023–Present

- Delivered custom ERP and POS solutions, such as a desktop-based ERP using Electron, a POS system for Shosha Mart, and tailored systems for culinary and healthcare businesses.
- Technologies: JavaScript, Electron, Laravel, Node.js, MySQL.
- Participated in the Pijar Hackathon.

## EDUCATION

---

Bina Sarana Informatika University | Information Technology

Specialized in software development and programming logic, establishing a strong technical background for building scalable digital platforms.

Jakarta Pusat 1 Vocational High School | Office Administration Automation

Learned key principles of administrative management and workflow efficiency, which supports my understanding of business processes.
